User manual for Object Picking Robot

□ Charging the Robot:

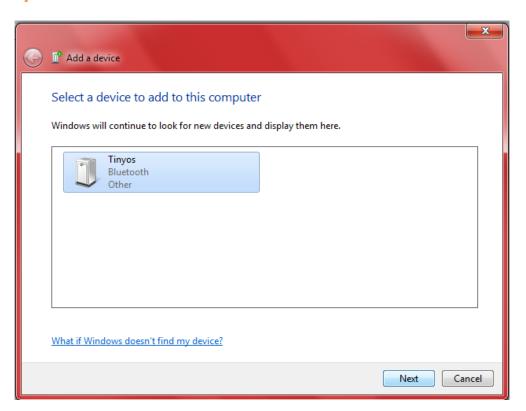

□ Connecting bluetooh device:

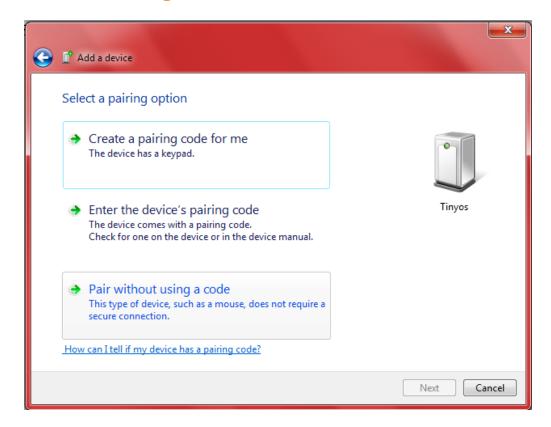

- 1. Turn ON the Robot.
- 2. Connect your Bluetooth dongle to your computer's USB port.
- 3. Select Bluetooth Devices >> Add a device from your taskbar.

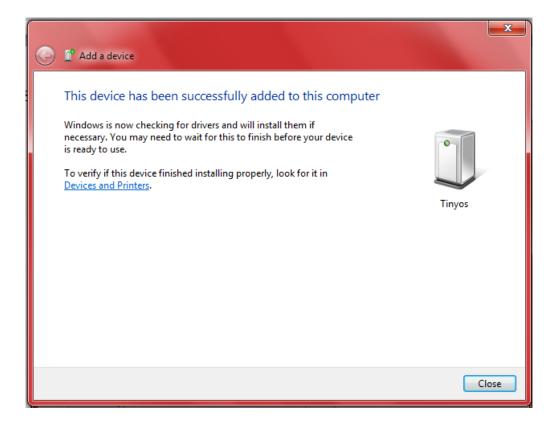

4. Select Tinyos and click Next.

5. Select Pair without using a code.

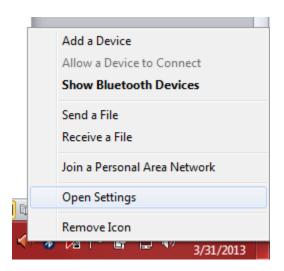

6. The Bluetooth device will be added successfully. Click Close.

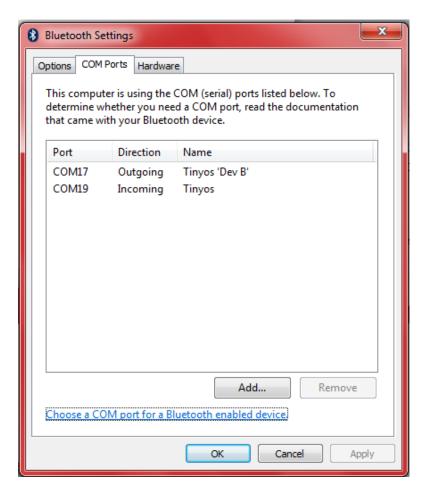

□ Serial port checking & configuring:

1. Select Bluetooth Devices >> Open Settings from your taskbar.

2. There will be 2 COM ports: Outgoing & Incoming. We need only Outgoing port, which is here COM17.

3. Open Robot >> src >> robot >> comm.txt and write outgoing port COM** there without any new line character. For here, outgoing port is COM17.

□ Installing RxTx before running the Program:

1. Copy both rxtxSerial.dll and rxtxParallell.dll to:

C:\Program Files\Java\jdk1.6.0_03\jre\bin C:\Program Files\Java\jre1.6.0_03\bin

2. Copy **RXTXcomm.jar** to:

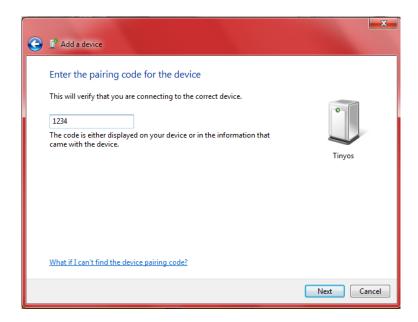

C:\Program Files\Java\jdk1.6.0_03\jre\lib\ext
C:\Program Files\Java\jre1.6.0_03\lib\ext

□ **Program running:**

- 1. Turn ON the Robot.
- 2. Copy "Object picking robot" folder to "F:" drive.
- 3. Open "Robot" project in NetBeans.
- 4. Click "Clean and Build Project", then "Run Project".
- 5. Click on the Bluetooth Devices notification icon on taskbar.

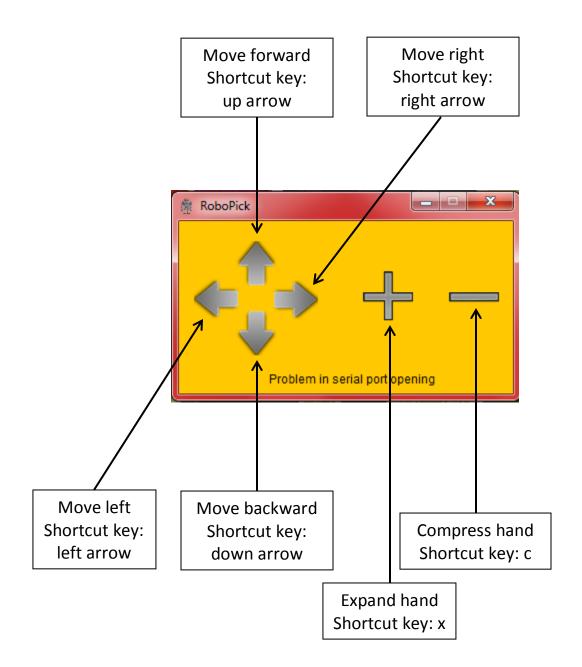

6. Type 1234 as pairing code and Click Next.

7. Click Close.

□ **Program commands & operations:**

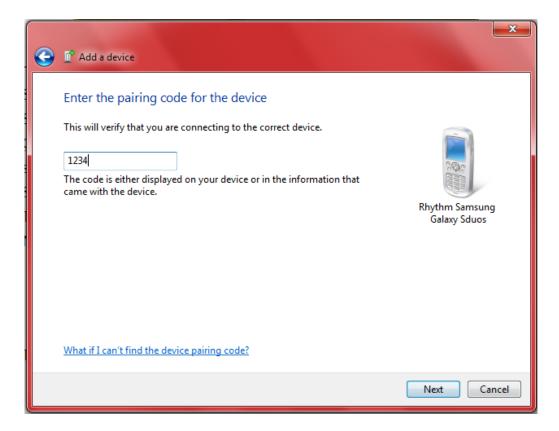

□ Bluetooth Webcam running:

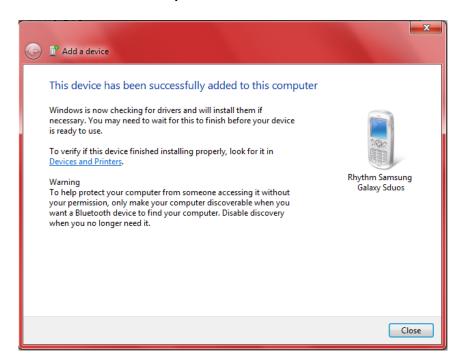

- 1. Start SmartCam on your computer. Then minimize it to the taskbar.
- 2. Start SmartCam on your Android mobile.
- 3. Goto Settings>>Bluetooth server and then select your desired bluetooth server.
- 4. Select Connect bluetooth.
- 5. Type 1234 as device's required PIN and select OK.
- 6. Now, on your computer, click on the **Bluetooth Devices notification icon** on taskbar.

7. Type 1234 as device pairing code and select Next.

8. The device will be successfully added. Click on Close.

9. Finally, double click on the **SmartCam** icon on taskbar to maximize it. You'll be able to see the video.
